Summary

Computer Science undergraduate with a CGPA of 9.3 and strong foundations in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Experienced in Python, Java, React.js, Node.js, Docker, and AI-powered application development. Built LLM-based and machine learning-powered applications, with a strong interest in scalable software systems, problem solving, and full-stack development.

Education

- B.Tech in Computer Science and Engineering**, Aditya Engineering College 2023–2027
CGPA: 9.3

Technical Skills

- Languages:** C++, Java, Python, C, SQL
- Frontend:** HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, React.js, React Native, Responsive Web Design
- Technologies & Tools:** Node.js, REST APIs, MongoDB, Docker, Git, GitHub, Vite
- Core Concepts:** OOPS, DBMS, Operating Systems, Computer Networks, DSA, Problem Solving

Internship Experience

Full Stack Developer Intern May 2025 – June 2025 Technical Hub, Surampalem

- Developed and maintained full-stack web applications using React and Node.js.
- Improved backend performance and system reliability through efficient development practices.
- Designed and managed MySQL databases with optimized queries for efficient data handling.
- Performed API testing using Postman and debugged backend workflows to enhance reliability.

Projects

EcoVana – Sustainable Living Platform Live Demo

- Developed responsive web interfaces ensuring compatibility across desktop, tablet, and mobile devices.
- Built reusable UI components improving maintainability and scalability.
- Integrated REST APIs for dynamic content rendering and user interactions.
- Improved usability through responsive layouts and accessibility-focused design.

Tools Used: HTML5, CSS3, JavaScript, REST APIs, AI Chatbot, Database Management, Git, GitHub

Smart AI Route Guider (React Native, JavaScript, REST APIs) GitHub

- Developed an AI-powered route planning application using React Native.
- Integrated Maps, Traffic, and Geolocation APIs for real-time route optimization.
- Built reusable UI components and responsive mobile screens.
- Optimized application performance for a smooth user experience.

Tools Used: React Native, JS, Node.js, REST APIs, AI Integration, Frontend Development, Backend Development, APIs

AlgoNest – DSA Learning Platform GitHub

- Developed a responsive DSA learning platform with structured roadmaps.
- Built categorized problem sheets and curated learning resources.
- Designed reusable UI components for better user experience.
- Implemented responsive layouts for desktop and mobile devices.

Tools Used: HTML5, CSS3, JavaScript, Git, GitHub

Simple Plagiarism Checker GitHub

- Developed a plagiarism detection web application using Flask.
- Implemented TF-IDF vectorization and Cosine Similarity algorithms to detect textual similarity across documents.
- Supported TXT, PDF, and DOCX file uploads.
- Generated similarity scores to identify duplicate content.

Tools Used: Python, Flask, Scikit-learn, TF-IDF, Cosine Similarity, PyPDF2, python-docx

Certifications and Achievements

- MongoDB Associate Developer Certification
- IT Specialist Certification – HTML, CSS, JavaScript
- Oracle Java Global Certification
- CISCO: C, C++, Operating Systems
- HackerRank Certifications in SQL and Python
